Work Experience

Cognizant Technology Solutions — ***Chennai, Tamil Nadu, India***

Data Integration Engineer | Python, SQL, AWS,Teradata, Pyspark, Snowflake — *January 2025 – Ongoing*

- Owns end-to-end **Databricks Enterprise Delta lake** for an investment data platform at a fund-administration and banking client, loading **40+ tables** from 80+ source feeds and processing **25M+** records daily; THe ETL pipeline delivers **97pc** on-time SLA performance for downstream reporting
- **Orchestrate 10+ production job** streams across CA Workload Automation (ESP) and **Amazon EventBridge**; diagnose upstream file misses and multi-stage failures across dependency chains spanning **50+ downstream loads**.
- Built **SQL post-load checks** for null rates, referential integrity, distribution drift, and row-count variance to catch content defects before they reach reporting. Developed during a client hackathon; the internal team estimated **80K+ dollars** in annual soft-cost savings.
- Processed and transformed CSV files using PySpark on AWS Glue, applying column reordering, casting, and omission to align with target schemas for analytics readiness.
- Designed Python scripts to validate and load structured sales data into Redshift, and archived raw data in Teradata for historical analysis

Phenx Machine learning Technologies Inc. — ***Cincinnati, Ohio, US***

Data Science Research Intern | Python, Xgboost, LSTM , SARIMAX, Git — *December 2023 – June 2024*

- Developed and analyzed predictive models using tools such as **LSTM** and **SARIMAX** to interpret datasets accurately.
- Created detailed graphs and reports to identify **trends** and **correlations** with other factors.
- Managed the content creation process from ideation to publication, ensuring **high-quality** and on-brand content for clients.
- Provided **strategic insights** using **data analytics** for client business expansion based on regional sales data across the USA.
- Implementing the new process and automation to streamline the workflows and increase the efficiency of the team.

Project Experience

AI Data-Ops Incident Copilot

- Built a synthetic pipeline-operations lakehouse with **Databricks Lakeflow, PySpark, Delta Lake, and Unity Catalog**, organizing job runs, dependency lineage, file events, and logs for 15+ simulated workflows.
- Involved a **Python/FastAPI and LangGraph incident copilot using Databricks AI Search** and read-only tools to inspect job status, lineage, logs, and runbooks; returned evidence-linked root causes and approval-gated remediation recommendations.
- Implemented **robust error handling and security measures** for reliable and secure data transfer.

Dynamic Sentiment and Prediction Analysis

- Engineered a **robust Sentiment Analysis project** leveraging **BERT** and **Beautiful Soup** for diverse product reviews.
- Utilized **React.js and FastAPI with CORS** support to create an interactive and efficient cross-platform solution.
- Extracted **sentiments from billions of reviews** across industries, providing comprehensive analytics.

Packet Capturing and Replay Project

- Developed a **Python-based HTTP TCP server using the 'http.server' and 'socket.server' modules**, enabling real-time data response.
- Engineered a **TCP client with the 'requests'** library and send individual packets from '.pcap' files, ensuring efficient data transfer.
- Implemented robust error handling and security measures for reliable and secure data communication between client and server.

Education

Guru Nanak Institute of Technology — ***Kolkata, West Bengal, India***

B.Tech in Computer Science and Engineering (CGPA: 8.92) — *Graduation Date : June 2025*

Skills

Data Engineering tools: Apache Spark, PySpark, Teradata, Snowflake, AWS Glue, Redshift
AI led Development: Multi-Agent System Orchestration, Self-Healing Code Pipelines, AI IDEs: Cursor, Claude Code, GitHub Copilot, Codex
Back End Development: REST API, Python, Shell Scripting, MySQL, Data Warehousing, ETL
Soft Skills: Product Management, Client Sales, Communication, Context Window Optimization, AISDLC , Problem-solving

Certifications

01/10/2024 **Microsoft Azure Cloud Fundamentals(AZ900),** Credential Id - F68F6B49854C6B51 *India*
04/13/2026 **Data Engineering With Databricks,** Databricks *India*
